---

## KEY ACADEMIC PROJECTS

- **TuneUp** – A full-stack vehicle management app developed using MERN stack. Allows users to log fuel and service records, view vehicle details via VIN, track monthly expenses, receive maintenance reminders, PDF/CSV export options and integrated stripe payment support.  
Github Link: <https://github.com/zaidae2023/tommorowsweb>

- **MoneyTrack** – A collaborative web app built to help users manage income, track expenses, scheduled payments, and download financial reports. Key features include secure user login, interactive charts, PDF/CSV export options, and integrated stripe payment support.  
*Github Link:* <https://github.com/zee321123/finalyear>
- **WordPress Website (Group Project)** – Collaboratively built a business website for Gohar Al Gillani company. Integrated and connected various components to transform the concept into a fully functional WordPress website.  
*Demo Video:* <https://youtu.be/9qBOJ3Q8I34>
- **WordPress Practice Site** – Built a sample website to explore theme customization and layout editing using Elementor and plugins. Gained a working understanding of WordPress functionality.
- **SEO Practice Project** – Applied basic SEO techniques to improve a demo site's structure and visibility, using tools like Screaming Frog SEO Spider, Yoast and Google Search Console for testing and analysis.
- **Digital Forensics Investigation** – Conducted a detailed investigation on provided forensic images, analyzing digital data and generating comprehensive reports documenting findings, processes, and conclusions.
